

Batch/Lot Tracking on Transfers, Receipts & Deliveries

Every Indent, Internal Transfer, Receipt (GRN) and Delivery now shows Batch, Batch Qty and Expiry Date on its line items. This guide explains what you'll see, where you can create a brand-new batch, and where you can only pick from what already exists.

Audience Warehouse, purchasing, sales and inventory staff **Reading time** ~5 minutes

CONTENTS

- 1. What you'll see on the Operations tab
- 2. Receiving goods: this is the only place to create a new batch
- 3. Internal Transfers & Deliveries: pick from existing batches
- 4. Once created, a batch is available everywhere
- 5. Common questions

1. What you'll see on the Operations tab

Whether you're working on an Indent Request's Internal Transfer, an Inventory internal transfer, a Purchase Receipt, or a Sales Delivery, the Operations tab shows the same three columns on each line item:

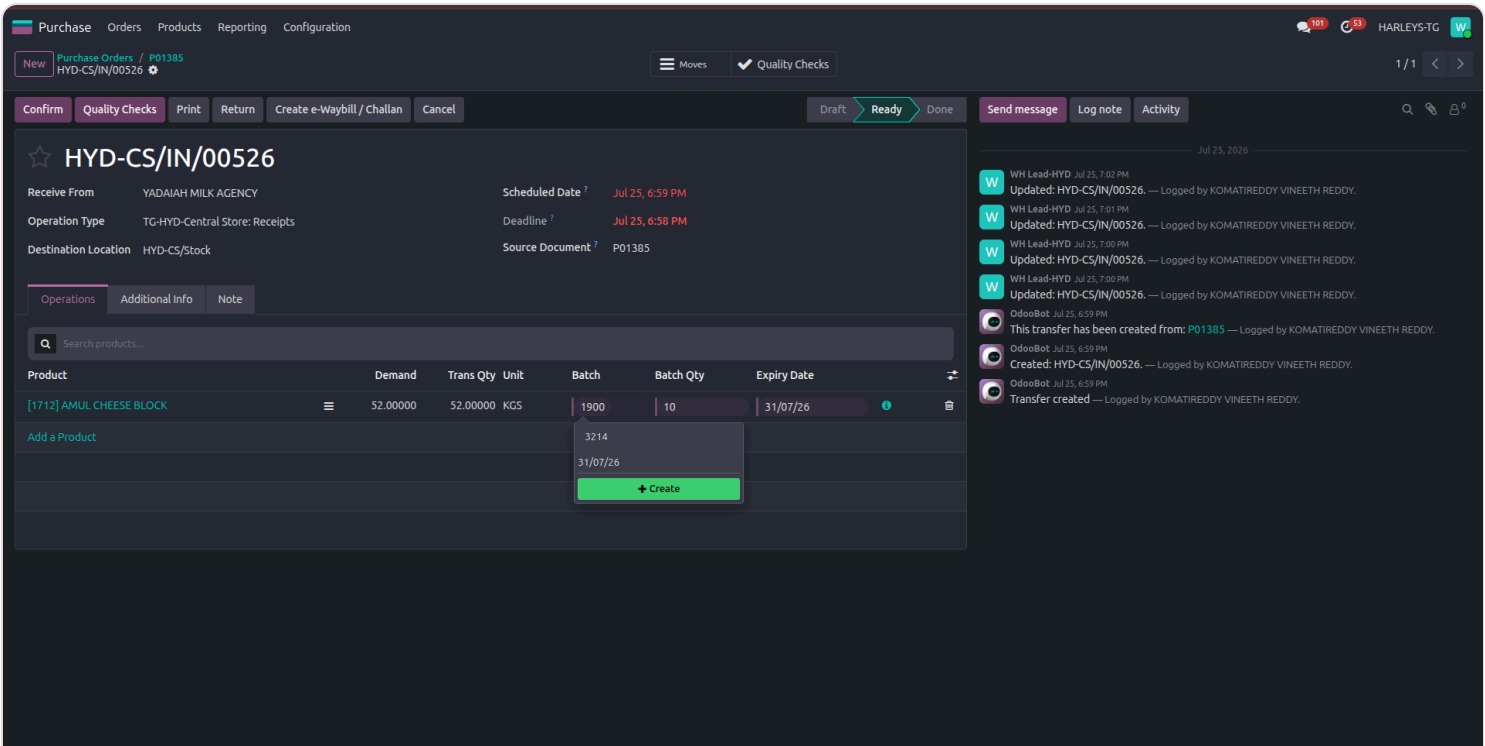

COLUMN	WHAT IT MEANS
Batch	Which batch/lot number this line is drawn from. You can add, pick, or remove a batch here.
Batch Qty	How much of that batch is being moved. Type the number directly.
Expiry Date	The batch's expiry date, shown for reference (dd/MM/yy format).

These columns only appear on the four document types above — you won't see them on other kinds of stock moves.

2. Receiving goods: this is the only place to create a new batch

When you open a **Purchase Order's Receipt (GRN)** and click "Add" in the Batch column, you get a popover that does two things at once: it searches your typing against batches that already exist for that product, *and* it offers a "+ Create" option to mint a brand-new batch number.

1 Type a batch number to search or create

purchase_orders_create_new_batch.png — the popover shows any matching existing batch alongside a "+ Create" button, so you can reuse a batch number or start a new one from the same field.

2 See both matches and the create option together while typing

The screenshot displays the Odoo Purchase Orders interface. At the top, there are navigation tabs: Purchase, Orders, Products, Reporting, and Configuration. The current view is 'Purchase Orders / P01385'. Below this, there are buttons for 'New', 'Confirm', 'Quality Checks', 'Print', 'Return', 'Create e-Waybill / Challan', and 'Cancel'. The main header shows 'HYD-CS/IN/00526'. Below this, there are fields for 'Receive From' (YADIAH MILK AGENCY), 'Operation Type' (TG-HYD-Central Store: Receipts), 'Destination Location' (HYD-CS/Stock), 'Scheduled Date' (Jul 25, 6:59 PM), 'Deadline' (Jul 25, 6:58 PM), and 'Source Document' (P01385). On the right side, there are buttons for 'Draft', 'Ready', 'Done', 'Send message', 'Log note', and 'Activity'. Below these, there is a search bar and a table with columns: Product, Demand, Trans Qty, Unit, Batch, Batch Qty, and Expiry Date. The table shows one row for '[1712] AMUL CHEESE BLOCK' with a demand of 52.00000, a trans qty of 52.00000, a unit of KGS, a batch of 1900, a batch qty of 10, and an expiry date of 31/07/26. Below the table, there is a dropdown menu for 'Add a Product' showing a list of batches: 30003421, BAF031, BAF1311, BAF1361, and July1359. A green '+ Create' button is at the bottom of the dropdown. On the right side, there is a chat window with messages from 'WH Lead-HYD' and 'OdooBot'.

purchase_orders_select_if_batch_exists.png — as you type, existing batches that match appear immediately, so you can double-check a batch doesn't already exist before creating a duplicate.

3 Set the expiry date when creating a new batch

purchase_orders_create_new_batch_select_exp_date.png — if the product tracks expiry, you must pick a date here before the batch can be saved. Dates before today are greyed out, so a batch can never be backdated.

WHY ONLY HERE?

Batches physically come into existence when goods are received, so the Receipt/GRN screen is the one place the system lets you create a new batch number. Every other screen only lets you draw down against batches that already exist.

3. Internal Transfers & Deliveries: pick from existing batches

On an **Indent Request's Internal Transfer**, an **Inventory app Internal Transfer**, or a **Sales Delivery**, clicking "Add" in the Batch column opens a simple list of batches that already exist for that product — there's no "+ Create" option on these three flows.

1 Indent-originated Internal Transfer

The screenshot shows the 'Indent Request' screen for the item 'HYD-CS/TRANSHYDCS/01267'. The header includes navigation buttons like 'New', 'Moves', and 'Next Transfer'. Below the header, there are tabs for 'Check Availability & Reserve', 'Confirm', 'Print', 'Return', and 'Cancel'. The main content area displays product details and a table of items. A dropdown menu is open for the second item, showing a list of batches.

Product	Demand	Trans Qty	Unit	Batch	Batch Qty	Expiry Date	
[479] MQ PISTA NUTS	Available	0.50000	0.50000	KGS	0009038	0.5	08/06/27
[676] NUTELLA HAZELNUT SPREAD	Available	1.00000	1.00000	KGS	1005Z06	1	02/06/27
[1963] TC BLUEBERRY FRUIT FILLING	Available	1.00000	1.00000	KGS	1005Z06		01/06/27
[1327] TC STRAWBERRY FRUIT CRUSH	Available	1.00000	1.00000	LTR	20000453		01/06/27
[709] LOTUS BISCOFF SPREAD	Available	1.00000	1.00000	KGS	333250426		28/06/27
[692] WC SPREAD WHITE FILLING	Available	1.00000	1.00000	KGS	342		28/02/27
[521] ALDIA APPLE FRUIT FILLING	Available	1.00000	1.00000	KGS	360		28/02/27
[480] FERRARO ROCHER CHOCOLATE	Available	16.00000	8.00000	PIECE	360K40		30/05/28
					40402026		25/02/27
					11133380		25/02/27
					30250526	1	25/02/27

indent_internal_transfers_receipt.png — the dropdown lists batches you can pick from; there's nothing to create here.

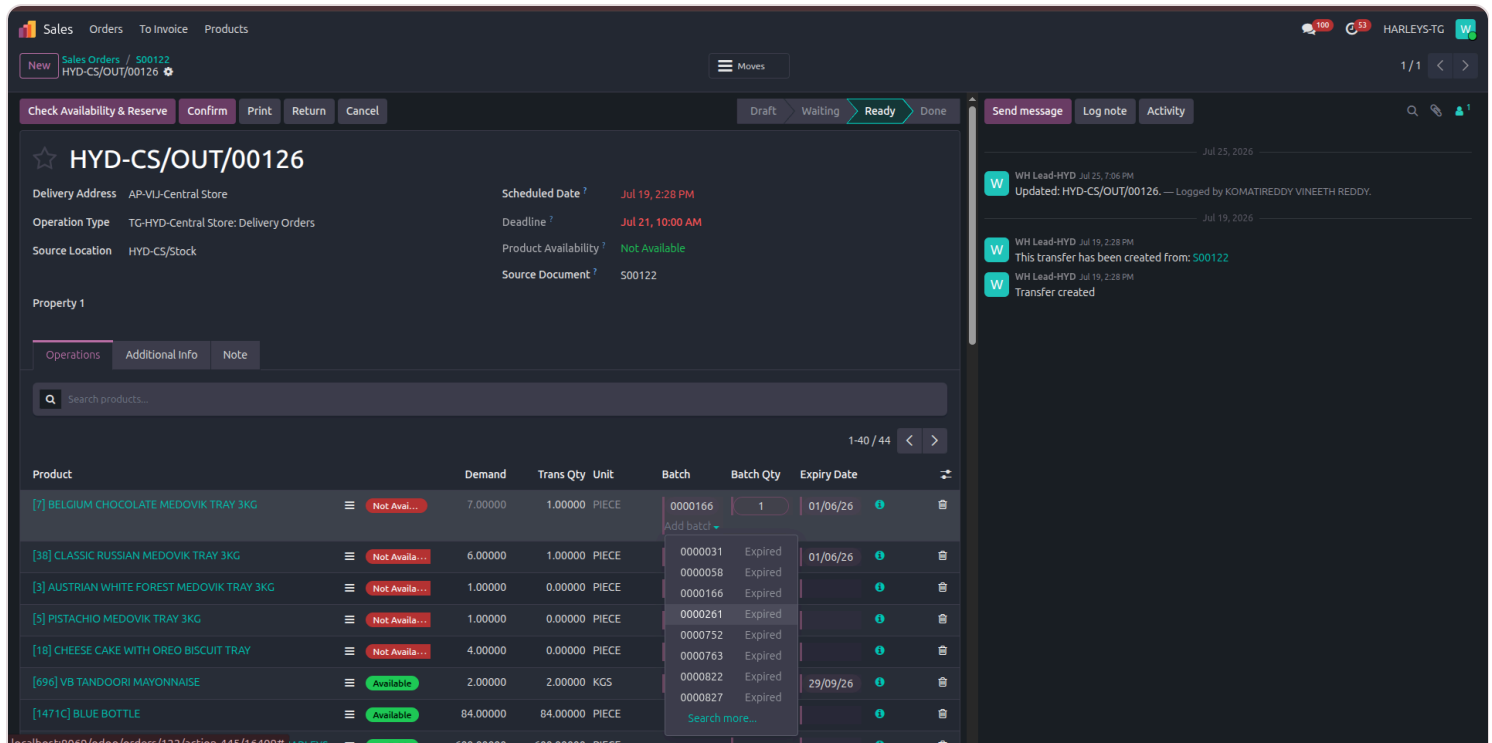

2 The same record, from the Inventory app

The screenshot shows the 'Inventory' app screen for the same item 'HYD-CS/TRANSHYDCS/01267'. The header includes navigation buttons like 'New', 'Moves', and 'Next Transfer'. Below the header, there are tabs for 'Check Availability & Reserve', 'Confirm', 'Print', 'Return', and 'Cancel'. The main content area displays product details and a table of items. A dropdown menu is open for the second item, showing a list of batches.

Product	Demand	Trans Qty	Unit	Batch	Batch Qty	Expiry Date	
[479] MQ PISTA NUTS	Available	0.50000	0.50000	KGS	0009038	0.5	08/06/27
[676] NUTELLA HAZELNUT SPREAD	Available	1.00000	1.00000	KGS	1005Z06	1	02/06/27
[1963] TC BLUEBERRY FRUIT FILLING	Available	1.00000	1.00000	KGS	1005Z06		01/06/27
[1327] TC STRAWBERRY FRUIT CRUSH	Available	1.00000	1.00000	LTR	20000453		01/06/27
[709] LOTUS BISCOFF SPREAD	Available	1.00000	1.00000	KGS	333250426		28/06/27
[692] WC SPREAD WHITE FILLING	Available	1.00000	1.00000	KGS	342		28/02/27
[521] ALDIA APPLE FRUIT FILLING	Available	1.00000	1.00000	KGS	360		28/02/27
[480] FERRARO ROCHER CHOCOLATE	Available	16.00000	8.00000	PIECE	360K40		30/05/28
					40402026		25/02/27
					11133380		25/02/27
					30250526	1	25/02/27

inventory_internal_transfers.png — whether you got here from an Indent Request or straight from the Inventory app, it's the exact same screen and behaves identically.

3 Sales Delivery

sales_order_delivery.png — same select-only behavior on a Delivery. Note that batches marked "Expired" still appear in this list and can still be selected — the system doesn't currently hide or block them, so it's worth checking the expiry date yourself before picking one.

4. Once created, a batch is available everywhere

A batch created on a Receipt isn't tied to that one document — the moment it's saved, it's available to pick from on any Internal Transfer or Delivery for that same product, anywhere in the company. You don't need to do anything extra to "make it available" elsewhere; it just is.

NOT SCOPED TO A WAREHOUSE

A batch created while receiving goods at one location currently shows up in the picker at every other location too, for the same product. If you're moving stock between warehouses, double-check the batch you pick is actually the physical stock you have in front of you.

5. Common questions

WHY CAN'T I CREATE A NEW BATCH ON THIS INTERNAL TRANSFER / DELIVERY?

By design — new batches are only ever created where goods are physically received, on a Purchase Receipt (GRN). Everywhere else, you're drawing down against batches that already exist.

CAN I STILL PICK AN EXPIRED BATCH?

Yes, today the system doesn't stop you — expired batches still appear in the picker (see §3). Treat the expiry date shown as information to check yourself before selecting one.

CAN ANYONE EDIT A BATCH'S DETAILS AFTER IT'S CREATED?

Right now, yes — there's no extra permission gate on editing an existing batch's own details (like its expiry date) beyond normal access to the record. A tighter "only a manager can change batch details" rule is a planned change, not yet built.

WHO CAN ADD OR REMOVE A BATCH FROM A LINE ITEM?

Anyone with ordinary access to Lots & Serial Numbers can add or delete a batch row, on any of the four document types, as long as the document isn't already locked/done.
